DIVISION OF
OIL, GAS & MINING

RE: Redmond Bentonite Pit
ACT/041/012
Letter Dated 8-24-83

Dear Mr. Portle:

In response to items 1-6 of your letter:

1. There are five soil stockpiles on the property which have been measured as to average height, length and breadth. Their total volume is calculated at 2,754 cubic yards.
2. Western Clay Company will diligently pursue all opportunities to secure a beneficial use for the pits after mining is completed. The most likely use at this time is a sanitary landfill for the town of Redmond, UT.
3. Appropriate test plots will be constructed prior to 11-30-83.
 - A. The method utilizing pea gravel to eliminate a slippage surface will not be attempted at this time as it is not considered to be necessary.
4. Western Clay Company agrees to the soil test parameters as outlined.
- 5-6. A collection pond has been constructed on the property to contain, and evaporate all waters discharged from the pits. This should sufficiently address these items.

In response to items A.B. & C.

- A. Western Clay Co. will have no impact on this item.
- B. This letter will hopefully address this item.
- C. Please see the attached page - revised reclamation cost estimate.

I hope that with this letter we can successfully conclude this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Thomas E. Robison', with a long horizontal flourish extending to the right.

Thomas E. Robison
